

Exercise No : 5

Date : 12/10/2020

AIM:

To Write a Python function to print missing characters to make string pangram.

PROGRAM:

```
a=input()
```

```
a=set(a.strip())
```

```
a.remove(chr(32))
```

```
b="abcdefghijklmnopqrstuvwxyz"
```

```
b=set(b)
```

```
b=b.difference(a)
```

```
b=list(b)
```

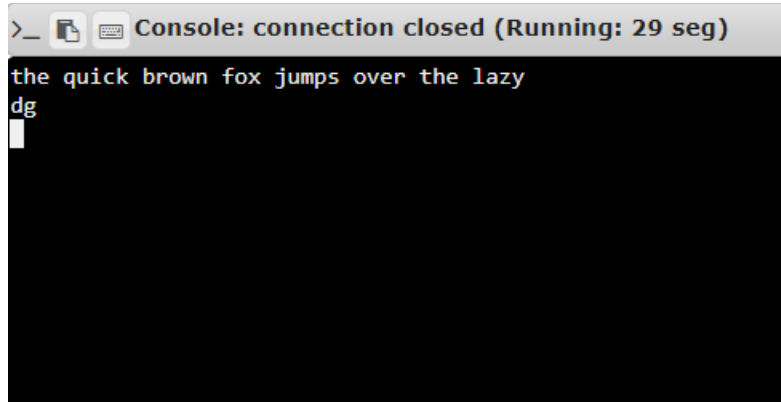

```
b.sort()
```

```
print("".join(b))
```

OUTPUT:

A screenshot of a console window. The title bar is grey and contains the text ">_ Console: connection closed (Running: 29 seg)". The console area is black with white text. The first line of text is "the quick brown fox jumps over the lazy". The second line of text is "dg". A white cursor is visible at the end of the second line.

```
>_ Console: connection closed (Running: 29 seg)
the quick brown fox jumps over the lazy
dg
```

RESULT :

The output has been successfully executed and verified.
